

M4 J15 Improvement scheme

Update - November 2020

We're continuing to make good progress despite restrictions during the pandemic and changes in the way we work to ensure the safety of our workforce.

Drainage and embankment works are progressing well in the north east corner of the site on the A419, see below

We've started widening both the circulatory and the westbound off-slip and we've also cleared vegetation on the southwest corner in readiness for drainage works.

The next phase will see vegetation clearance being carried out on the southeast corner of the A419. Then we'll begin reconstruction of the westbound off-slip carriageway, followed by drainage and widening works on both the southeast and southwest quadrants of the circulatory.

Thank you for your patience whilst these works are carried out. We always aim to work to programme, however adverse weather or unforeseen circumstances may mean changes to our plans. If you have any questions or comments about the work, or would like further information, please contact Highways England Customer Contact Centre on **0300 123 5000** (open 24/7) or email us at: info@highwaysengland.co.uk

Please follow us on Twitter at [@HighwaysSWEST](https://twitter.com/HighwaysSWEST) or our regional Facebook page at www.facebook.com/HighwaysSWest to receive up to date information about this and other works in the Southwest, alternatively visit www.trafficengland.com for details of all our roadworks.
